PROFESSIONAL SUMMARY

Computer Science undergraduate (CGPA 8.72) with hands-on full-stack development experience across five projects and three internships. Comfortable across React.js, Angular, and MongoDB, with a strong DSA foundation in C/C++/Java, and growing exposure to Python data tooling (NumPy, Pandas, Matplotlib, Seaborn) and Generative AI.

EDUCATION

B.Tech in Computer Science & Engineering — **CGPA: 8.72**
Maulana Azad National Urdu University, India — **Expected 2027**

TECHNICAL SKILLS

Languages: C, C++, Java, Python
Web Development: HTML5, CSS3, JavaScript (ES6+), React.js, Angular, Tailwind CSS, Node.js, Express.js
Core Concepts: Data Structures & Algorithms, OOP, DOM Manipulation, Event-Driven Programming
Databases & Tools: MongoDB, Git & GitHub, VS Code, REST APIs, Responsive Design
Data & AI: LLM APIs, NumPy, Pandas, Matplotlib, Seaborn, Generative AI, foundational Machine Learning concepts

INTERNSHIP EXPERIENCE

Web Development Intern • Acmegrade — **Jul 2024 - Aug 2024**
- Built responsive web pages with HTML5 and CSS3, ensuring consistent rendering across desktop and mobile breakpoints.
- Partnered with senior developers to build and refine reusable UI components for client-facing projects.
- Applied web accessibility guidelines and agile workflow practices in a team setting.

Java Programming Intern • CodeAlpha — **Jun 2024 - Jul 2024**
- Built multiple Java mini-projects applying core OOP principles (encapsulation, inheritance, polymorphism).
- Solved algorithmic challenges to strengthen problem-solving and code efficiency.
- Took part in peer code reviews, improving code readability and documentation practices.

Web Development Intern • Remarkskill Education — **Jun 2024 - Jul 2024**
- Delivered live web development projects under mentorship, following a real-world dev workflow.
- Designed and deployed mobile-first, responsive interfaces.
- Worked across the project lifecycle from requirements gathering to final delivery.

PROJECTS

Aura – Personalized AI Voice Assistant • Personal Project Live Demo — **Ongoing**
- Developed a personalized AI voice assistant using React.js, Node.js, Express.js, MongoDB, and LLM API for natural voice-based task interaction.
- Implemented features for notes, reminders, weather updates, and information retrieval with personalized user assistance.
- Built REST APIs and integrated the AI/LLM backend with the frontend using Axios, with MongoDB for storing user data and preferences.
- Designed a responsive and user-friendly interface using React.js, Vite, and Tailwind CSS, with future scope for multilingual, email, calendar, and smart-home integration.

SnapShoes - Full-Stack E-Commerce Web Application • Personal Project — **Ongoing**
- Developing the frontend of a full-stack e-commerce shoe platform using React.js, JavaScript, and Tailwind CSS.
- Building product listing and detail pages, cart, wishlist, and user login/registration flows.
- Designed a fully responsive UI across mobile, tablet, and desktop breakpoints.

Automated Hostel Allocation System • College Group Project
- Collaborated with a team to build a database-driven hostel allocation system with a student allocation workflow and an admin management panel.
- Owned the frontend and integrated it with the database layer to automate seat allocation, cutting down manual admin effort.
- Implemented constraint-based allocation logic to keep the process fair and consistent across students.

Intelligent Task Management System (To-Do Web App) • Personal Project
- Built a task management app with dynamic prioritization and real-time UI updates in vanilla JavaScript.
- Implemented local storage persistence so tasks remain saved across browser sessions.
- Structured the codebase in modular components for easy extension.

User Interaction-Based Music Player (Spotify Clone) • Personal Project
- Built a music player with a custom seek bar, playlist management, and real-time UI feedback.
- Studied user interaction patterns to improve interface responsiveness and navigation flow.

ACHIEVEMENTS & ACTIVITIES

- Maintained a CGPA above 8.5 throughout the B.Tech program, currently at 8.72.
- Completed three internships across web development and Java programming within a single academic year.
- Contributor at Social Summer of Code (SSoC), an open-source program produced technical content and translations for developer audiences.
- Actively maintain personal projects on GitHub (GitHub).
